FIG. 6

FIG. 7

FIG. 8 is a cross-sectional view of a roof assembly 10, showing a roof panel 12, a roof structure 14, and a roof edge 16. The roof panel 12 is supported by the roof structure 14, which is in turn supported by the roof edge 16. The roof edge 16 is shown in cross-section, revealing a series of overlapping layers. The top layer is a waterproofing membrane 18, which is secured to the roof structure 14 by a fastener 34. Below the waterproofing membrane 18 is a layer of insulation 20, which is also secured to the roof structure 14 by a fastener 34. The bottom layer of the roof edge 16 is a structural member 48, which is secured to the roof structure 14 by a fastener 34. The roof panel 12 is shown in cross-section, revealing a series of overlapping layers. The top layer is a waterproofing membrane 18, which is secured to the roof structure 14 by a fastener 34. Below the waterproofing membrane 18 is a layer of insulation 20, which is also secured to the roof structure 14 by a fastener 34. The bottom layer of the roof edge 16 is a structural member 48, which is secured to the roof structure 14 by a fastener 34.
